Spring Water, Personalized Water, Bottled Water

<https://arcticchiller.com>

We're local, we're experienced, and we're everywhere you need us to be. Arctic Chiller is located in Sherwood Park, Alberta, Canada. The bottling facility is made up of state of the art productions equipment. The plant contains four major production lines. These lines being 4 litre line producing product for retail and commercial use, 20 litre bag in a box mostly for commercial applications. Last but not least, the high speed bottling line. This line is constantly being upgraded to improve service to the customers. This computerized production line is capable of producing 450 bottles per minute that once produced automatically move to the SMI staging area where the products are sorted, packaged, coded and then prepared for shipping.
