## wholesale batteries

<https://is.gd/Q8Z553DF>

Lithium battery charge and discharge only 400-600 occasions, specifically altered merchandise, but 800 occasions. The nickel-metal hydride rechargeable battery can reach a lot more than 700 occasions, some good quality merchandise as many as 1200 occasions charge and discharge, this sort of a comparison, the nickel-metal hydride batteries dwell for a longer period than lithium batteries. Also, the cost of nickel-metal hydride batteries is way decrease compared to lithium batteries. Also, strictly talking, lithium batteries have the same memory effect, but its memory effect is quite reduced, basically negligible.
