A Tool for Technological Intelligence

<https://www.arttablet.org>

Patents are the largest source of technological information. Patent are given to the inventor as a reward for its innovation in the form of the exclusive right of the monopoly for a period of 20 years from the priority date of the invention. Due to advancement in the IT sector and internet, now these valuable documents are in the reach of the general public. Any person skilled in the art can go through various patent databases and after a search can get the patent document of their need. There are different patent databases viz, USPTO, EPO, JPO, etc freely open for the public access. If we go through the patents related to a specific technological area, we will be able to find the lots of information about the life cycle of the technological innovation viz.,
