Day Trading Options Daily Review for August 4th, 2015 - Making Money with Stock Options

<https://youtu.be/vp6diolZwJE>

Day Trading is talked about and seems mysterious. Some people are quietly very successful while the masses are warned about the dangers. The course takes away the complexity and shows the non-technical (and some technical) parts of trading Stock Options. The course includes examples of good and bad indicators. This course has the rules for trading successfully and why they work.
