Welcome to the world's first 3D printed metal gun | Dangerous Prototypes

<https://dangerousprototypes.com/2013/11/13/welcome-to-the-worlds-first-3d-printed-metal-gun/>

3D Printed Metal Gun by Solid Concepts and our ability to 3D Print the world's first metal gun solidifies our standing. The gun is a classic 1911, a model that is at once timeless and public domain. It functions beautifully: Our resident gun expert has fired 50 successful rounds and hit a few bull's eyes at over 30 yards. The gun is composed of 30+ 3D Printed components with 17-4 Stainless Steel and Inconel 625 materials. We completed it with a Selective Laser Sintered (SLS) 3D Printed hand ...

3D Printed Metal Gun by Solid Concepts and our ability to 3D Print the world's first metal gun solidifies our standing. The gun is a classic 1911, a model that is at once timeless and public domain. It functions beautifully: Our resident gun expert has fired 50 successful rounds and hit a few bull's eyes at over 30 yards. The gun is composed of 30+ 3D Printed components with 17-4 Stainless Stee
